Specimen Type: Urine Temperature Refingerate LAB8862 NESSERIA GONORRHOCAE, RINA Specimen Type: To AVOIR RELIEFTONS BE SURE TO FOLLOW SEX/SOURCE/CONTAINER CUDIELINES OUTLINED IN THE SPECIMEN CONTAINER SECTION. • The patient SEX AT BIRTH AND SPECIMEN SOURCE Will dearmine which collection container needs to be used. This is na accordance with PDA instructions for Use (IPU) for the testing. • This test cannot be used for passives of age; requests for this testing for patients <14 years of age will be aent out to our referral laboratory. • This test in not to be used for medico-legal purposes. • If the collection containers authritisted is not appropriate for the sex and source as indicated below, the test will be rejected. Throughpartyped Unite Temperature: All swabs: Room temperature or refrigerate United Speciment Type: Speam (preferred) OR plusma, PROZEN Temperature: Response LAB9041 NEURON SPECIFIC ENGLASE (NSE), SERUM Speciment Type: Speam (preferred) or Research and the Common temperature (Preferred) or Research and the Common temperature (Preferred) or Research and the Common temperature (Preferred) or Research (Preferred) or Resea	CODE		CPT4 CODE
Specimen Type: TO AVOID REJECTIONS BE SURE TO FOLLOW SEX/SOURCE/CONTAINER GUDELINES QUITALEO IN THE SECTION. The patient SEX AT BIRTH and SPECIALEN SQUECE will determine which collection container needs to be used. This is in accordance with FDA Instructions for Use (FU) for this sesting. This test cannot be used for patients -14 years of age, requests for this testing for patients -14 years of age will be sent out to our reterral laboratory. This test is not to be used for medico-legal purposes. If the collection container submitted is not appropriate for the sex and source as indicated below, the least will be rejected. This test is not to be used for medico-legal purposes. If the collection container submitted is not appropriate for the sex and source as indicated below, the least will be rejected. Threshold in the collection container submitted is not appropriate for the sex and source as indicated below, the least will be rejected. The collection container submitted is not appropriate for the sex and source as indicated below, the least will be rejected. The collection container submitted is not appropriate for the sex and source as indicated below, the least will be rejected. This test is not to be used for metaporpriate for the sex and source as indicated below, the least will be rejected. This test is not to be used for retering a sex and source as indicated below, the least will be rejected. The collection container submitted is not appropriate for the sex and source as indicated below, the least will be rejected. LAB9041 NEURON SPECIFIC ENCLASE (NSE), SERUM Specimen Type: Flustman submitted (SER), SERUM Specimen Type: Serum or plasman Temperature. Refigerated LAB9190 Nocition and Metapolities, Quantitative, Urine Specimen Type: Serum or plasman Temperature. Refigerate LAB9041 Nocition and the serum of the serum of the serum from a plain red-top	LAB9043	Specimen Type: Urine	82570 82523
needs to be used. This is in accordance with FDA Instructions for Use (IFU) for this testing. This test cannot be used for pratients of 4 years of age, requests for this testing for patients <14 years of age will be sent out to our reformal alboratory. This test is not to be used for medico-legal purposes. If the collection container submitted is not appropriate for the sex and source as indicated below, the test will be rejeated. Throughplan lyngout Rectal Urine Temperature is always. Room temperature or refrigerate Unrine stream of the test will be repeated. Rectal Urine Temperature is serum (preferred) OR plasma, FROZEN Temperature is Resum (preferred) OR plasma, FROZEN Temperature is Refrigerate LAB9041 NEURON SECIFIC ENOLASE (INSE), SERUM Specimen Type: serum RUBRON SECIFIC ENOLASE (INSE), SERUM Specimen Type: plasma, serum OR cerebrospinal fluid (CSF) Temperature: Refrigerate LAB9035 NICOTINE AND METABOLITE, QUANTITATIVE, PLASMA, WHOLE BLOOD, OR SERUM Specimen Type: Plasma, whole blood OR serum Temperature: Refrigerate LAB9190 Nicotine and Metabolite, Quantitative, Urine Specimen Type: Urine Temperature: Refrigerated LAB1048 MR LIPOPROFILES (WiTH LIPIDS (WITH GRAPH)) Specimen Type: Spun MRIR LIPOTROFILES (WITH GRAPH) Specimen Type: Spun Security LiPIDS (WITH GRAPH) Specimen Type: Sound Temperature: Refrigerate LAB9036 NOROY/BUSD DETECTION, REAL-TIME PCR Specimen Type: Sound Temperature: Refrigerate LAB9037 NOROY/BUSD DETECTION, REAL-TIME PCR Specimen Type: Sound Temperature: Refrigerate LAB9038 NORTH COUNTY DUST ALLERGEN (2 ALLERGENS AND TOTAL IGE) Specimen Type: Serum Temperature: Refrigerate LAB9092 NORTH COUNTY DUST ALLERGEN (2 ALLERGENS AND TOTAL IGE) Specimen Type: Serum Temperature: Refrigerate LAB90939 NORTH COUNTY DUST ALLERGEN (2 ALLERGENS AND TOTAL IGE) Specimen Type: Serum Temperature: Refrigerate	LAB8862	Specimen Type: TO AVOID REJECTIONS BE SURE TO FOLLOW SEX/SOURCE/CONTAINER	87591
